Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4-6 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Plants et al. (5,952,847).

Fig. 2 discloses a first voltage 5.0, a second voltage 3.3, an input signal (node at output of 40), an inverter 14, an inverse input signal (input to 22), and a level shifter 12 connected and operating as recited in claim 1.

Further shown is an NMOS pull-up transistor 22 and an NMOS pull-down transistor 20 as recited in claims 2 and 4-6.

The level shifter is within and integrated circuit as recited in claim 8.

Conclusion

3. Claims 3, 7 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claims 10-16 appear to be allowable over the Prior Art of record.
